## REPORT

Dr. Ashish Srivastava delivered a lucid talk on how to prepare a scientific manuscript and publish it in high quality journals. He gave the guidelines from designing the experiments to its interpretation and how to write the manuscript as per the guidelines provided by the Journal. He spoke about journals which are peer reviewed, Scopus listed in web of science and impact factor. He said some of the high-quality journals charge for publication which may not be affordable so a choice has to be made if it is slightly of a lower impact factor and open access then mostly they are free. He also spoke about the novelty and significance of the work done to be systematically organised to convey the main idea. He said the manuscript should clearly demonstrate how novel it is and it should be structured to answer the objective proposed. The visuals should be high quality figures and support the conclusion. He also explained step by step the preparation of the scientific manuscript and visually demonstrated the seven steps. The session was highly interactive and the participants agreed upon writing a good manuscript as an exercise. The meeting ended with vote of thanks to Dr. Ashish Srivastava.
