## Report

**Name of the Event:** Choo Macchar workshop

**Organised by:** NSS Unit of R.J. College in collaboration with CIVIS

**Day and date:** Thursday, 8th February 2024

**Time:** 11:00 am to 01:00 pm

**Venue:** Room no. 12, R.J. College

**Objective of the activity :** The objective of the activity was to create awareness about the diseases caused by mosquitoes and how we should stop such illnesses.

**Number of volunteers :** 34

### UN SDG

**1.Good Health and Well-being (SDG 3):** If the workshop focuses on educating people about mosquito-borne diseases like malaria, dengue, or Zika, it could contribute to SDG 3 by raising awareness about health risks and prevention measures.

**2.Quality Education (SDG 4):** Workshops aimed at educating communities, especially in regions prone to mosquito-borne diseases, could contribute to SDG 4 by providing valuable knowledge and promoting educational opportunities for all.

**3.Sustainable Cities and Communities (SDG 11):** Mosquito control is essential for creating healthy and sustainable urban environments. Workshops on managing mosquito populations could support SDG 11 by promoting sustainable practices and improving living conditions in cities and communities.

**4.Life on Land (SDG 15):** Mosquitoes are a part of terrestrial ecosystems, and efforts to control mosquito populations often involve methods that aim to minimise harm to other organisms and ecosystems. Therefore, workshops focusing on environmentally friendly mosquito control methods could contribute to SDG 15 by promoting biodiversity conservation and sustainable land management practices.

**5.Partnerships for the Goals (SDG 17):** Collaboration between governments, NGOs, community organisations, and other stakeholders is crucial for effective mosquito control efforts. Workshops that bring together different stakeholders to discuss and implement mosquito control strategies can contribute to SDG 17 by fostering partnerships and cooperation for sustainable development.

**Brief description :** A "Choo Macchar" workshop typically refers to a workshop focused on mosquito control and prevention measures. "Choo Macchar" is a colloquial term in Hindi, where "Choo" means mosquito and "Macchar" means insect or mosquito. These workshops are often organised in regions where mosquito-borne diseases such as malaria, dengue, Zika,

and chikungunya are prevalent, with the aim of educating communities about mosquito control strategies and promoting public health.

Here's a brief description of what might be covered in a "Choo Macchar" workshop:

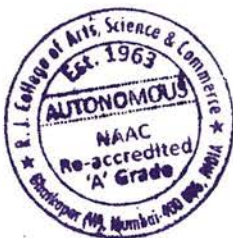

**Introduction to Mosquito-Borne Diseases:** The workshop may begin with an overview of common mosquito-borne diseases, their transmission mechanisms, symptoms, and potential health impacts on individuals and communities. **Mosquito Biology and Behavior:** Participants may learn about the biology and behaviour of mosquitoes, including their life cycle, breeding habitats, feeding preferences, and activity patterns. Understanding mosquito biology is essential for implementing effective control measures.

**Mosquito Control Strategies:** The workshop may cover various mosquito control strategies, including both chemical and non-chemical methods. This could include information on the use of insecticides, larvicides, mosquito nets, repellents, and environmental management techniques to reduce mosquito breeding sites. **Community Engagement and Participation:** Emphasis may be placed on the importance of community involvement in mosquito control efforts. Participants may be encouraged to take proactive measures to eliminate mosquito breeding sites in and around their homes, such as removing stagnant water, keeping water storage containers covered, and maintaining clean surroundings.

**Role of Government and Public Health Authorities:** The workshop may highlight the role of government agencies and public health authorities in mosquito control and disease prevention. Participants may learn about government-led initiatives, surveillance programs, and response strategies for managing mosquito-borne disease outbreaks. **Health Promotion and Personal Protection:** Participants may receive guidance on personal protection measures to reduce the risk of mosquito bites, such as wearing long-sleeved clothing, using mosquito repellents, and sleeping under insecticide-treated bed nets, especially during peak mosquito activity times.

Overall, a "Choo Macchar" workshop aims to empower communities with knowledge and skills to combat mosquito-borne diseases effectively. By promoting awareness, behaviour change, and community engagement, these workshops contribute to improving public health outcomes and reducing the burden of mosquito-borne illnesses in affected regions.

Students participated in the workshop.
