## Report

**Name of the Event:** Mangroves and marine ecosystem session

**Organised by:** NSS Unit of R.J. College in collaboration with United way Mumbai

**Day and date:** Thursday, 15th February 2024

**Time:** 11:00 am to 01:30 pm

**Venue:** Saboo Hall, R.J. College

**Objective of the activity:** The objective of the activity was to provide information as well as create awareness about the mangrove and marine ecosystem

### UN SDG

**1.SDG 14:** Life Below Water: Mangroves and marine ecosystems are vital components of coastal and marine biodiversity. A session dedicated to these ecosystems can raise awareness about the importance of preserving marine life, conserving coastal habitats, and combating threats such as pollution, overfishing, and habitat degradation, thereby contributing to SDG 14's targets of conserving and sustainably using marine resources.

**2.SDG 15:** Life on Land: Mangroves are transitional ecosystems that bridge the gap between terrestrial and marine environments, supporting a diverse array of plant and animal species. By highlighting the ecological functions and services provided by mangroves, such as coastal protection, carbon sequestration, and habitat provision, the session can contribute to SDG 15's objectives of protecting terrestrial ecosystems, halting biodiversity loss, and promoting sustainable land management practices.

**3.SDG 13:** Climate Action: Mangroves play a crucial role in climate change mitigation and adaptation. They act as carbon sinks, sequestering large amounts of carbon dioxide from the atmosphere and storing it in biomass and sediments. Additionally, mangroves provide natural coastal buffers against storm surges, erosion, and sea-level rise, helping to build resilience to climate change impacts. By discussing the role of mangroves in climate change mitigation and adaptation, the session can support SDG 13's goals of combatting climate change and its impacts.

**4.SDG 11:** Sustainable Cities and Communities: Coastal cities and communities benefit from healthy mangrove ecosystems, which provide valuable ecosystem services such as flood protection, water filtration, and recreational opportunities. By emphasising the importance of preserving and restoring mangroves in urban and peri-urban areas, the session can contribute to SDG 11's targets of making cities inclusive, safe, resilient, and sustainable.

**5.SDG 12:** Responsible Consumption and Production: Unsustainable fishing practices, habitat destruction, and pollution threaten the health and integrity of marine ecosystems, including mangroves. A session on mangroves and marine ecosystems can advocate for sustainable fisheries management, responsible tourism practices, and pollution prevention

2019: Star College Status by DBT

2008: Best College by University of Mumbai 2010: IMC RBNQ Award 'Performance Excellence' for the year 2009

measures, aligning with SDG 12's objectives of promoting sustainable consumption and production patterns.

**6.SDG 17: Partnerships for the Goals:** Achieving conservation and sustainable management of mangroves and marine ecosystems requires collaboration and partnerships among governments, civil society organisations, the private sector, and local communities. The session can facilitate dialogue, knowledge sharing, and capacity building among stakeholders, fostering multi-stakeholder partnerships to address common challenges and achieve shared goals related to mangrove and marine conservation.

**Brief description:** A session focused on mangroves and marine ecosystems typically aims to educate participants about the importance, conservation, and management of these critical coastal habitats. Here's a brief description of what such a session might entail:

1. Introduction to Mangroves and Marine Ecosystems: The session begins with an introduction to mangroves and marine ecosystems, highlighting their significance as vital habitats that support a diverse range of plant and animal species. Participants learn about the unique characteristics of mangroves, including their adaptability to coastal environments and their ecological functions.

2. Ecological Importance: The session explores the ecological importance of mangroves and marine ecosystems, emphasizing their role in providing essential ecosystem services such as shoreline protection, coastal erosion prevention, carbon sequestration, and habitat for marine biodiversity. Participants learn how mangroves contribute to maintaining coastal ecosystem health and resilience.

3. Threats and Conservation Challenges: Participants are informed about the various threats and conservation challenges facing mangroves and marine ecosystems, including habitat loss, deforestation, pollution, climate change, overfishing, and unsustainable coastal development. The session highlights the importance of addressing these threats through conservation and management efforts.

4. Conservation Strategies and Best Practices: The session presents conservation strategies and best practices for protecting and restoring mangroves and marine ecosystems. This may include discussions on protected area management, habitat restoration projects, sustainable fisheries management, community-based conservation initiatives, and integrated coastal zone management approaches.

5. Community Engagement and Stakeholder Involvement: Participants learn about the importance of community engagement and stakeholder involvement in mangrove conservation and management efforts. The session explores approaches for fostering collaboration and partnerships among government agencies, non-profit organizations, local communities, indigenous peoples, and other stakeholders to promote sustainable stewardship of coastal resources.

6. Case Studies and Success Stories: The session may include case studies and success stories from around the world to illustrate effective mangrove conservation and management practices. Participants learn from real-world examples of projects and initiatives that have

successfully protected, restored, and managed mangroves and marine ecosystems, inspiring them to act in their own communities.

7. Interactive Activities and Discussions: Throughout the session, participants engage in interactive activities, group discussions, and knowledge-sharing exercises to deepen their understanding of mangroves and marine ecosystems. They can ask questions, share their experiences, and exchange ideas with fellow participants and experts in the field.

Overall, a session focused on mangroves and marine ecosystems provides an opportunity for participants to gain knowledge, insights, and inspiration for conservation action, fostering a greater appreciation for these invaluable coastal habitats and the urgent need to protect them for future generations.

Students participated in the session.
