Software needs to be added

If we can add some courses which enhance students softskills then it would be great. It will help them in their corporate life

I think we should introduce more software opportunities during graduation

NA

- Practical seasons at Bsc level should have a good balance of manual (using calculators) and software based exercises. This will make students well acquainted with formulae of some descriptive statistics and also keep them abreast with scripting languages like python, R etc.

- Include topics like gradient descent which is a commonly deployed convergence algorithm employed in various ML models today. Also, survival analysis/ cox proportional hazards model could be a good addition which finds many applications in industry.

Advanced Machine Learning and application

No

Software Skills - SQL, PYTHON etc

No

No.

NA

Additionaly one can prepare them with Mock interviews done by industry expert

Adding concepts of Data Lakes in addition to Data warehousesis important as many mid to top tier companies have started deploying this to scale, maintain their data. Especially, to cater to their Data Science and Analytics needs.

Curriculum covers very basic ML which will not differentiate students from other universities. Also we need to restrict theory if we are specifically making this industry specific.It can be more application oriented

Application of all the theories should be taught with sizable amount of data and it's benefit for the business/industry.

Exploratory data analysis should be taught at a deep level along with the relevant parameters because basic data understanding is very important basis business/industry before proceeding for any ML model

Software skils

No as such I remember

Course curriculum is good enough I would suggest you must encourage the students to do real world projects apart from regular curriculum related to the topic covered in academic.

If we can add skills or courses related to soft skills that will help students to grow faster in their corporate career.

No

No.

ining domain knowledge of industry that the student wants to go into

1) The course contains lots and lots of unwanted theories , no practical with real world example. Improvement - Instead of using old practical method using pen paper for marks ,I would suggest give some basic problems based on data in Excel and tell them to just analyze the data build the dashboard with insights,calculating mean mode z test ,t test not solve the problem,it can help but how this will impact ,if it is not then there is no point to use it on this problem.

2) I would like to suggest course on reading graphs , Number skills,Funnel and how to analyse funnel , A/B testing, Data presentation most important.

3) Learn to ask questions , Data folks must ask cross questions.

No

No.

No

It was great

No

Few Additional workshop we can conduct for the students to gain the knowledge of different tools that industry using such as PowerBI, Tableau.

No suggestions.

Please don't use old way of taking practicals on sheets instead you can tell students to participate in the competition based on their capabilities.

It's good

Sure, I've been working for Ernst & Young for more than 1.5 years, and during that time, I've experienced many highs and lows when dealing with senior colleagues, Indian clients, and clients from other countries. I believe it could help prepare your current students for successful careers in the corporate world and other industries.

We all know that theoretical knowledge of statistics is important, but it's equally important for students to learn how to apply statistical methods to solve real-world problems. Encourage them to work on group projects that involve analysing data from actual organisations or industries, and ask students to present their findings in class with other students. That will also help them translate the technical concepts into everyday language, which will definitely boost their communication skills and teamwork, as communication skills and teamwork are most important in corporate world as well as in every industry.

As we know, statistics is a rapidly evolving field, and it's important for students to stay upto date on new developments and technologies. Encourage students to continue learning after graduation or post-graduation through professional development courses, certifications, and other learning opportunities related to software like Python, SAS, and SQL.

Additionally, experience always matters, so for career-related guidance, invite a guest speaker from the industry to share their experience and career paths, and ask them to provide resources like job search websites and interview preparations.

Python or any other

Please Focus more on practical skills.

Yes, we have to improve our curriculum .we
Should focus on practical aspect like what type of skill require in corporate ,because most students have plan for corporate.few of them will be interested in government job. Thanks to our family of statistics. 🙏

no

Research oriented projects for all each year. Add-on courses in SAS and Power BI if possible. Courses related to obtaining significant results and giving proper statistical conclusions and key findings in different scenarios must be encouraged to enhance the skills of the students.

python for data analysis

Advance python

If more topics of applied statistics are added, eg : intro to machine learning , exploratory data Analysis in TY such that after graduation entry level job in statistics should welcome students

No.

Don't know

Sports

How about introducing some latest economic knowledge along the ongoing curriculum?
Like say, How was the Test of Hypothesis used in outlining the year's budget or In which way did the various/any specific company(s) use Time Series to predict the trends in market and What did they do to use the predictions in their favour?

Computer enhancement

No

(Hindi Vidya Prachar Samiti's **RAMNIRANJAN JHUNJHUNWALA COLLEGE of Arts, Science & Commerce)**

Opposite Ghatkopar Railway Station, Ghatkopar (West), Mumbai 400086, Maharaṣhtra, INDIA.

Website: www.rjcollege.edu.in   Email: rjcollege@rjcollege.edu.in   Tel No: +91 22 25151763   Fax No: +91 22 25150957

College is recognized under Section 2(f) & 12(B) of the UGC Act, 1956

Affiliated to UNIVERSITY OF MUMBAI || NAAC Re-Accredited 'A' Grade (CGPA: 3.50)

Courses which help to use our theoretical knowledge in practical and which are in demand in the industries

Applied Statistics

Some basics of software related to statistics (eg:using R software,etc)

No idea

DATA BASE

Yes, My SQL, applied statistics in real life

Computer programming

Yes,basic of computer languages should be taught in class.How to escape the Matrix!

No need

English speaking course

On any Programming languages

Add project

Nothing

It will be related to communication skills or interview preparation.

Add some sports and general knowledge for developing student. It is better for add some sport it will automatically increase thinking capability

Any other suggestions

51 responses

No

No

None

Nothing

Nope

Give more industrial knowledge rather than theory.

no

Other suggestions would be breaking the 60-40 rule of marks distribution to 40-20-20. Where for 40 marks theory, 20 marks research project and remaining 20 marks for internal and other. This would ensure student to earn maximum marks along with good practical exposure. And if possible the department can help with the publishing of top 10 research papers in journals which would raise the name of the Department and college as well as beneficial for students in future carrer.

It is good, I don't think it needs any suggestion.

Syllabus should be more concise.

Please give practical knowledge of concepts,
Spare time for that, because this will means alot for us in futures problem solving questions.

Should add more in demand skills and eliminate the non necessary topics

Applications of every topic in everyday life

There must be some industrial visit related to our field and exposure towards our subject.

I don't know

Revision is required

Include more activities.....(which will enhance our knowledge)

It's already good teacher to guid students perfectly. No suggestions 😊.

All sir and teacher have there own rules for books, practical,and home work hence it is better to having single rule for all study work for the student for better and welfare for study.PLEASE add some sport and skill for the better for the students development.
