Students Feedback

Students feedback on Curriculum 2022-23

Suggestions:

1)	Need to manage time because Odd SEM takes almost 6 months to complete and Even sem are completed in 4 months only in this academic year. It puts lots of mental pressure on us
2)	Please add courses related to data science,ml,ai..
3)	Lectures should start after 8:15am.
4)	Portion is being taught so fast that you can grasp it fastly.Study should go a little bit slower. Practicals need to be taught clearly.
5)	All mam should complete portion slowly
6)	Take it a little slow

Action proposed –simplify some topics in new NEP format, try to take additional / remedial sessions

Industry Feedback

Industry feedback on Curriculum 2022-23

Suggestion:

1	The course curriculum is good overall, but it is lacking some of the latest technology trends that students should know to get hired by the IT companies quickly.
2	Should include subjects around how to use business communication to convert specifications into business language. The end user of technology is not a technologist and use of language to bridge the gap between business and technology is missing in the industry today!
3	There should also be few courses in the emerging areas like AI and ML. How Chatgpt is going to influence the future can be an interesting debate topic to students.
4	Cloud , Networking , integration, automation and sustainability are areas not covered and need of industry.

Suggestions:

1)	Principles of GIS should be considered for replacement, with courses which are aiming to enhance ERP skills or data warehousing(on standard softwares) skills of students as most of the MNC's hire students for this technology.
2)	We just need to improve the placement for the students since most of them struggle to get the interview selection.
