## CERTIFICATE COURSE IN ENVIRONMENTAL SCIENCE

### ABOUT US

Hindi Vidya Prachar Samiti was incepted on the auspicious day of Shri Krishna Janmashtami, 15th August 1938. A brain child of a visionary Late Shri Nandkishore Singh Jairamji, samiti was established with the objectives of catering to the educational needs of the Hindi speaking community. Ramniranjan Jhunjunwala College came into existence in 1963, enabling a larger section of the society to take advantage of the facilities provided for higher education.

From 1999-2000 the College has added a number of self-financing courses like B.M.S., B.B.L, B.Sc. in Computer Science, Information Technology, Biotechnology, M.Sc. in Computer Science, Biotechnology and Information Technology as well as add on courses, which further hone the special skills of the students.

The college has been re-accredited with 'A' Grade by NAAC in 2014 with a CGPA 3.50 and received the Best College Award (2007-2008) of the University of Mumbai. The College has been bestowed with IMC "Ramkrishna Bajaj Performance Excellence Trophy", 2010.

The Principal of the college was awarded "Best Teacher" by Government of Maharashtra in 2011.

Government of Maharashtra conferred the college with "JAAGAR JAANIVANCHA" (First in Mumbai Suburban- in 2013 and Second in Mumbai Suburban- in 2014) for safety of girls.

Course Code: **RJCHEC04**

Duration: **30** hours

Credits: **02**

### LEARNING OUTCOME

At the end of this course student will be able to

- Understand the various factors responsible for environmental pollution
- Learn about the analytical techniques to monitor and control air, water, soil and noise pollution.
- Uses of Green Chemistry and its applications

CERTIFICATE COURSE IN ENVIRONMENTAL SCIENCE

## COURSE CONTENT

### Module 1: General Perspectives, environmental components, Resources, Ecosystem & Pollution

1. Soil pollution, solid waste generation, management and waste disposal and processing techniques, waste reduction, product Introduction to environmental science, an overview of atmosphere.
2. Natural resources, ecosystem, material cycles
3. Environmental Pollution, Pollution monitoring, Pollutant stability and Pollution reduction.
4. Air pollution: Air pollutant, photochemical smog. Effects of air pollution, effects of indoor air pollutants, Urban air quality management and national ambient air quality status.
5. Monitoring and remediation of air pollution.
6. Water pollution, Water chemistry, nature of water pollutants, quality degustation, monitoring and remediation of water pollution, marine pollution, oil pollution, oil spill-clean-up options.
7. Soil pollution, solid waste generation, management and waste disposal and processing techniques, waste reduction, product recovery and recycling.
8. Noise pollution, concept of sound, noise and hearing problems, effect of noise pollution, noise mapping and abatement of noise pollution.

### Module 2: Current Environmental Issues, Health and environment, Environmental Planning Management, Green Chemistry & quality assessment

1. Global warming, greenhouse effect, global ozone problem, acid rain, global CO<sub>2</sub> rise and impact on biosphere.
2. Vehicular pollution, radiation hazards, energy management, Toxicology, Natural disasters.
3. Health and environment, World health report, Immunology and human diseases, allergies due to environmental impacts.
4. Environmental planning, Managing the natural resources, Land use policy in India.
5. An introduction to Green Chemistry and its applications.
6. Analytical techniques: Monitoring techniques for the quality of air, water and soil.

### Module-I (15 Hrs.)

#### General Perspectives, environmental components, Resources, Ecosystem & Pollution.

Soil pollution, solid waste generation, management and waste disposal and processing techniques, waste reduction, product Introduction to environmental science, an overview of atmosphere.

Natural resources, ecosystem, material cycles

Environmental Pollution, Pollution monitoring, Pollutant stability and Pollution reduction.

Air pollution: Air pollutant, photochemical smog. Effects of air pollution, effects of indoor pollutants, Urban air quality management and national ambient air quality status.

Monitoring and remediation of air pollution.

Water pollution, Water chemistry, nature of water pollutants, quality degradation, monitoring remediation of water pollution, marine pollution, oil pollution, oil spill-clean-up options.

Soil pollution, solid waste generation, management and waste disposal and processing techniques, waste reduction, product recovery and recycling.

Noise pollution, concept of sound, noise and hearing problems, effect of noise pollution, noise mapping and abatement of noise pollution.

### Module-II (15 Hrs.)

#### Current Environmental Issues, Health and environment, Environmental Planning, Management, Green Chemistry & quality assessment

Global warming, greenhouse effect, global ozone problem, acid rain, global CO<sub>2</sub> rise and impact on biosphere.

Vehicular pollution, radiation hazards, energy management, Toxicology, Natural disasters.

Health and environment, World health report, Immunology and human diseases, allergies due to environmental impacts.

Environmental planning, Managing the natural resources, Land use policy in India.

An introduction to Green Chemistry and its applications.

Analytical techniques: Monitoring techniques for the quality of air, water and soil.

### Instructions to Students:

1. Attendance is compulsory for all sessions.
2. One hour of assignment for home work will be given every day by the teacher.
3. 2 credits will be given after successful completing the course.
4. MCQ test to be conducted at the end of the course.

At the end of the course student will be able to:

- Understand the various factors responsible for environmental pollution
