3. Applications and research proposals will be invited from staff for Seed Money to motivate teachers for research.
4. From this year PG students will also be provided with Seed money for research.
5. Activities to be conducted: Session on scientific writing, student project presentation, classic paper presentation. The meeting had very fruitful discussions and activities for the whole year were planned.
6. It was proposed to start a group of faculty members interested in research in order to guide them in choosing the journals, improving the quality of their research, etc. This suggestion was appreciated by some members.
7. The event "Classic Paper Presentation Seminar" introduced last year was also taken up for discussion. Several members opined that this activity was very useful and should be continued. Since this year too the pandemic is expected to continue at least for some time, it was expected that many students would not be able to carry out long projects so it was planned to repeat this event on the National Science Day. However, some students pointed out that some students do carry out online projects and it would be nice if they get an opportunity to present their work. So it was decided to organize a project presentation event in December.
8. A possibility of a workshop on Scientific Writing was also taken up. It was decided to repeat this activity in the month of January which was conducted two years back. While discussing this activity, the mention of activity on Science Writing too cropped up. It was thought that this was a useful skill for the students to acquire. As a result, it was decided that an event be planned around this theme sometime in November. Finally, it was decided to continue with the seminars on research opportunities in different fields as is done every year.

There being no other matter the meeting ended with vote of thanks to the Chair.
