Project Level Club

We all are aware how important role, trees play in our life. The main aim of our project is to be recognized as one of the most engaging, environmentally friendly that people can take part to make the planet a much better place to live in and also to create an awareness about the importance of the tree. Therefore, team community service thought about engaging people in planting. The main aim was also to make people quite busy at their place during lock down, so planting can be one of the best options they can get engaged in. It also focused on the key point i.e. as people will plant the saplings they will gradually keep a watch on it, look after the plants, take utmost care of the plant and understand the value of greenery. Initially a conversation took place with the VP Rtr. Rohan Jana. The project was held for whole one month so that the participants can keep on planting.

- All the details, plans, execution about the project were discussed. PR Message and Jpeg were made and released 2 days prior to the project. All the participants were made aware about the procedure on how to plant and a reference video on planting a sapling was circulated among various groups. So, that it makes it easy for the participants to plant. All the participants were made to send the pictures of the plant each day while they are growing. So, that it feels delightful. The main motto of the project is to plant seeds or saplings, generally for land reclamation, or landscaping purpose. After circulating PR message and JPEG, participants started their job of planting seeds and saplings and shared the pictures of the same. The pictures and videos which were received were heart warming and beautiful. Everyone looked after the plants and took utmost care of it. After 20-25 days when seeds started growing people sent those pictures of grown up plants, it looked amazing and beautiful. We should always understand the importance of trees, plants etc and always try and plant one or more saplings at home or else try and do gardening at home.
