REPORT

Project Name PUSHPADAR

Venue Ramniranjan Jhunjunwala College

Start Time 10-09-2021 11:00:00 End Time 23-09-2021 18:00:00

1. During festivals like Ganesh chaturthi the garlands and the flowers are thrown in lakes and beaches.
2. Which leads to water pollution and makes the surrounding filthy.
3. Flowers are the natural resources so they can be decomposed.
4. Compost enriches the nutrient content of the soil.
5. As flowers can be decomposed they work wonders when used as compost.
6. It works as fertilizer for plants and helps to grow better.
7. So we decided to organize a project where we can reuse the dried flowers that are to be thrown in beaches or lakes after devoting it to God.
8. If we use this idea of reusing floral waste as compost less waste would be generated.
9. Beach cleanup are great project but we need cleanup if we have waste in beaches.
10. But this project helps us to lower the rate of floral waste; hence beaches would be directly cleansed.
11. Also its necessary to create awareness about the floral waste management and the increase in water pollution during festivals.
12. For that we have to convince everyone to not throw the flowers instead we can put them in the soil.
13. This project can be a small yet a useful step towards a clean and healthy environment.

Summary :

1. The greatness of a culture can be found in its festivals.
2. And our culture never teaches us to pollute the environment.
3. We should enjoy our festivals keeping in mind that we should harm the environment.
4. Its our responsibility to keep our surrounding clean by taking small steps just like the project PUSHPADAR.
5. From many years during the festivals the floral waste are thrown in water dur to religious reasons.
6. Flowers are meant to grow, wilt and fall but not for water pollution.
7. So we should use this idea of decomposing the flowers and organic waste.
8. By creating compost or just by putting the floral waste under the soil will help the plants to grow and will develop the fertility of soil.
9. We should understand how crucial it is to Convince others to not dump the flowers in water and spreading the awareness about floral waste management.
10. Because the one that grows from the soil should return to the soil instead treating it as trash.
