DR KARISHMA S. KAUSHIK DURING THE SESSION

What is an 'Analogy'?

A comparison between one thing and another, for the purpose of understanding

Explain one thing in terms of another to highlight the ways in which they are alike

"Life is like a box of chocolates—you never know what you're going to get."

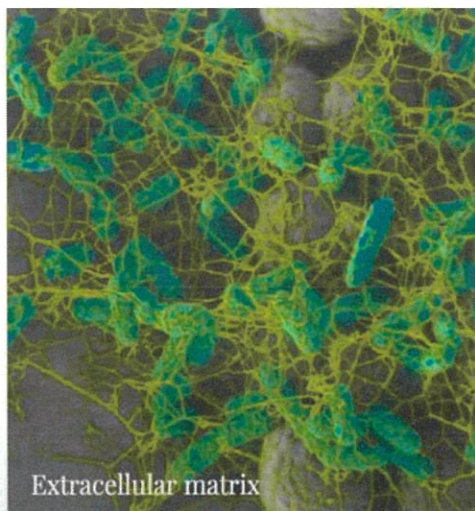

Life has many choices, surprises and flavors, just like a box of chocolates.

"Finding a good man/woman is like finding a needle in a haystack"

Finding a needle in a haystack is tedious and time-consuming, and the task at hand may also be so!

REPORT

Dr. Karishma who has returned back to our country for promoting science education by giving relevant examples from nature, how teaching can be made interesting by using 'Analogies in science' like an arm is to a leg and a leg is to a foot comparison of parts and functions. She made the session very interactive and went on to speak about common themes in biology like adaptations for functions convergence of structures, egg guarding etc. the second part of her session spoke about microbial biofilms how microorganisms allow to remain together and communicate and survive. She spoke about how they survive in any given location she also touched upon about communications in organisms like communication in bee hives, communication of labor and how that can be compared to biofilms. The session was interactive and students asked several questions, both on the chat box as well as on the mic. The session ended with expression on gratitude to the speaker by Dr. Himanshu Dawda.
