Environmental Awareness- Talk By Prof Akash Purswani, Department of Mass Media, RJ College

Environmental awareness is a very important aspect of holistic learning and need of the hour. Humans have a moral obligation to protect the environment and promote the sustainable development of the planet for future generations. Environmental degradation is detrimental and is jeopardising the long-term health and security of animals, plants and humans. Now more than ever, it is important that we understand the impact our actions have on the environment. In order to become more environmentally aware, we also need to take measures to protect the planet and hopefully undo some of the damage already caused by human activity.

The talk covered important aspects of environmental protection and how students need to consciously work towards making their surroundings as environmentally friendly as possible. Behaving in a more environmentally conscious manner can be as simple as making minor changes to your lifestyle.

Time:10:30- 11:30AM

### What is Environment?

- Environment is the surroundings or conditions in which a person, animal, or plant lives or operates.
- We broadly speak about 3 kinds of environments:
  - **Natural environment:**  
Includes water, light, land, air and all organisms that live in nature.
  - **Industrial (Built) environment:**  
Includes cities, villages, factories and all humans' synthesis
