## NOTICE

### Systems Biology- Linking Genotype to Phenotype

This lecture is arranged in association with ATBS on 18<sup>th</sup> August 2020 under R J Lecture series for the capability development and skill enhancement of students. It is important to remain informed about the upcoming trends in the field of any specialization and the speaker will focus on the central dogma of Biology of connecting gene to a phenotype. While it would mainly attract students from biological sciences, it would also generate interest and curiosity among the students of the other disciplines, as knowing about facts of human life is always a subject of larger interest. The session would remain open for staff and students of R J College and members of ATBS.

## Letter of Collaboration

The Association of Teachers in Biological Sciences was established in 2006 with the aim to promote excellence in the field of Biological sciences by bringing together teachers who are life long learners. It is our privilege to associate with Hindi Vidya Prachar Samiti's Ramniranjan Jhunjhunwala College this collaboration will be initially for a period of five years from 2018 to 2023 and shall extend further on mutual interest.

The Collaboration would be to conduct following activities but need not be restricted only to these any activity for the promotion of science is welcome.

1. To conduct workshop for members of teaching, non teaching staff and students
  2. To organise exhibitions for promotion of scientific temperament among school children and general public
  3. To organise career guidance sessions.
  4. To organise field trips to create awareness on biodiversity and its conservation
  5. To organise guest lectures by eminent scientists for creating awareness on recent trends in technology and thrust areas
  6. To organise seminars/ conferences
  7. To conduct interactive sessions with scientist
  8. Any other activity on mutual consent
- There will be no financial obligation on either side for any of these activities and all activities will be conducted on mutually agreeable terms

## REPORT OF THE LECTURE UNDER R J C LECTURE SERIES CAPABILITY DEVELOPMENT AND SKILL ENHANCEMENT OF STUDENTS ( AWARENESS OF TRENDS IN TECHNOLOGY)

### SYSTEMS BIOLOGY: K. V. VENKATESH

He described connecting gene to a phenotype as 'Central Dogma' of Biology giving example of Firefly *luciferase* enzyme. In molecular science, different components are identified and emphasised on system analysis and quantified in terms of Design, operation, control, fault diagnosis and evolve. Function of each component helps in designing of the overall system process and that leads to the phenotypic expression with precision derived from the perfect genotype. Citing AN example of *E.coli*, he explained how in nature the design of phenotypic expression based on genotype is 'Top-Down approach'. The complex interactions between the molecules in nature for different organisms is designed in order to assist the organism, which evolve with time and phonologically modifies adjusting to the environment. This highlighted the strength of genealogical design. The session was open for all staff and students of other college. The number of student beneficiaries from our college were 82.
