College is recognized under Section 2(f) & 12(B) of the UGC Act, 1956

Affiliated to UNIVERSITY OF MUMBAI || NAAC Re-Accredited 'A' Grade (CGPA: 3.50)

20<sup>th</sup> JUNE, 2020

## NOTICE

The department of physics is organising RJC Physics lecture series in association with IAPT Mumbai Sub RC under DBT star college activity. This activity intends to develop the capacity skills of students and for improving student capability by appraising them of the recent trends in technology. The lecture would be delivered by eminent physicist and would be interactive. the details of the session is available in the brochure. the session would be online on zoom platform.

Session: 23<sup>rd</sup>, June, 2020, 4PM

Resource Person: Dr P S Anil Kumar, Department of Physics, Indian Institute of Science Bangalore

Topic : Introduction to Spintronics

DBT STAR COLLEGE ACTIVITY

**RJC Physics Lecture Series 4:**

**Introduction to Spintronics**

Dr. P.S. Anil Kumar, Department of Physics, Indian Institute of Science, Bangalore.

Dr. Anil Kumar is Professor of Physics and Dean of undergraduate program of Indian Institute of Science, Bangalore.

His research interests are in experimental Condensed Matter Physics/Applied Physics/Material Science covering topics like spintronics, magnetic nano-structures, magneto-transport in metallic multilayers and oxides, magnetic properties of ultra-thin ferromagnets, spin polarized electron scattering, topological matter etc.

## REPORT

Capacity Development and skill enhancement activity organised for improving students capability ( Awareness of Trends in Technology)

Prof. P. S. Anil Kumar (IISc, Bengaluru) - 23 June - Introduction to spintronics

You Tube link: <https://www.youtube.com/watch?v=Dn1o5khhI-E>

Spintronics or magneto-electronics is an area of active research because of the tremendous potential both in terms of fundamental physics and technology. Here, one exploits the spin degree of freedom of the electrons along with its charge. So, spintronics combines standard microelectronics with spin-dependent effects. Hence, one can expect a new generation of devices with completely different functionality. The advantages of these magnetic devices would be non-volatility, increased data processing speed, decreased electric power consumption, and increased integration densities compared to semiconductor devices. With the advent of the nanotechnology the spintronic devices have become even more attractive. In the first half, I will focus on the importance of spintronics in the present context with some illustrative examples. Then there will be a discussion on the possibilities for the future developments.
