## NOTICE

The department of physics is organising RJC Physics lecture series in association with IAPT Mumbai Sub RC under DBT star college activity. This activity intends to develop the capacity skills of students and for improving student capability by appraising them of the recent trends in technology. The lecture would be delivered by eminent physicist and would be interactive. the details of the session is available in the brochure. the session would be online on zoom platform.

Session: 9<sup>th</sup> July, 2020, 4 pm

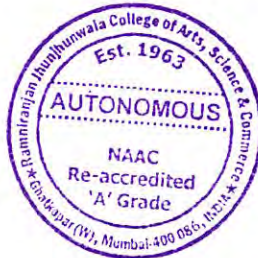

Resource Person: Dr R Ramaswamy Indian Institute of Technology, Delhi

Topic : Chance and Chaos

## REPORT

Capacity Development and skill enhancement activity organised for improving students capability ( Awareness of Trends in Technology)

Prof. Ram Ramaswamy (IIT, New Delhi) – 9<sup>th</sup> July,2020

### Chance and Chaos

You Tube link: <https://www.youtube.com/watch?v=bGQB1euM4QA>

Many phenomena in the everyday world are thought to occur "by chance". Chance can be defined as the absence of necessity, namely that other outcomes could just as easily happened. Chance is used extensively - the coin that is tossed at the beginning of many sporting events, for instance, or lotteries - and is crucial in several circumstances - evolution being a preminent example. In this talk, I will start with an analysis of the physical act of tossing a coin to understand how chance comes about, and give a brief introduction to the idea of unpredictability and how this is linked to nonlinear dynamics and chaos. Using simple examples, I will discuss the existence of different asymptotic states (or attractors) and discuss how chance can arise when there are several possible attractors, each corresponding to a distinct outcome. A corollary of the dynamics being chaotic is that the specific outcome occurs "by chance".
