Report:

The Department of Biotechnology organized session I of GYAN VIGYAN lecture series on 5th January 2023. Topic of the session was "Phylogenetic Studies". Dr. Aniket Saraf, PhD topic was phylogenetic and evolutionary studies of Cyanobacteria, was invited to give insight on the topic.

Dr. Saraf discussed how phylogenetic studies help to understand evolutionary relationships between different species, organisms, or characteristics of an organism (genes, proteins, organs, etc.) that are developed from a common ancestor through genetic changes. Phylogenies are useful for organizing knowledge of biological diversity, for structuring classifications, and for providing insight into events that occurred during evolution.
